PROJECT DESCRIPTION

Dipol Polska provides IT solutions for business and education. The customer decided to integrate their Time and Attendance systems with AggreGate platform. The major part of educational institutions constitutes kindergartens and schools for whom the partner has created eDziecko service. The systems work in cloud on Linux servers, therefore the customer decided to install AggreGate servers also in the same environment. This solution is very stable and makes it easy to remotely manage connected to the system card readers, located in the whole country. Transparent manual allowed to make integration with AggreGate Platform in a short time. Thanks to Ag-

greGate servers centralized management the customer doesn't need to monitor different readers on different controllers.

HARDWARE / ENVIRONMENT

GIGA-TMS time recorders and access control readers connected to the AggreGate server on Linux based cloud platform.

BENEFITS

AggreGate allows to save the time required to manage distributed infrastructure of readers, thanks to which our company can spend saved time on developing new features in our own systems.

SOLUTION

Time and Attendance
